About Us

Monolith: "A large single upright block of stone, especially one shaped into or serving as a pillar or monument, e.g. Stonehenge" This is a website developed by Arthur Jensen. It's a Single Page Design, the theme is named "Monolith". The project brief I received: "I want". His name comes from the concept of "leading the waters". So yes this is your theme to lead the waters. So Anyway this is where you add text About your Company, nothing long, it could be Welcome text as well (257 R 11)

NOTE :

This document encloses a description of our website packages and price ranges, The main difference between the packages are the features included in the package. Different features can be included or excluded in a package. Including or excluding features alters the package price range, in general, think of a feature as having a price range starting at P500. Note that some features come with a package by default.

Please note that a package pricing is not inclusive of Hosting Prices, a client may make their own enquiry from any preferred service provider. However, it is advisable that your Website developer advice on their preferred hosting provider, this can be particularly helpful for maintenance, updates and upgrades.

The list of Website features can be found in the last section of this document.
